

QHSE Company Policy

The target of our corporate policy is to supply our customers with high quality, reliable and competitive products on time. The basis for achieving this goal is a high corporate quality and a consistent focus on the needs of our customers. This policy applies to all company processes.

The protection of the environment is an important part of our corporate policy. We are aware that industrial activities can pollute the environment. We as a company are to reduce these burdens to a minimum within the scope of our economic and technical abilities. Above all, this includes the careful use of the available energy resources, which are achieved through constant improvement in energy efficiency and energetic performance.

Our responsibility for people and the environment is the basis of our actions. The continuous improvement of our quality, environmental and energy-related services is a requirement for the sustainability of our company and an important contribution to the protection of the environment.

Ensuring occupational safety as well as protecting and promoting the health of our employees is an equal corporate goal alongside economic interests, quality and environmental goals. Our employees are our most important capital. The main goal is to provide safe and healthy working conditions. We use technical, organizational and personal resources to ensure the greatest possible protection in the workplace. With foresight, we determine possible hazards and consistently analyze the circumstances that would or would have led to an accident at work. Corresponding improvement measures are implemented.

The management takes this corporate policy into account by

- the company policy and the associated goals are made known to all employees of our company, as well as to all persons, organizations or companies that work on our behalf,
- applicable legal obligations and other applicable requirements to which our company is committed are complied with,
- a high level of training of employees is promoted and the necessary resources are made available,
- the company policy is regularly evaluated, reviewed and, if necessary, updated and is accessible to all stakeholders,
- all employees at the site are permanently asked to actively participate in the processes and to participate in decision-making.

In all areas of our company, from management to the dispatch of our products, we want to avoid mistakes, unnecessary environmental pollution and energy waste. We will systematically analyze any deviations from the specifications of our IMS as well as sources of error and health hazards and eliminate them through implemented measures. This enables us to continuously improve our company processes.

Our understanding of management, as well as the positive attitude of all employees in our company to quality, environmental protection and occupational safety are requirements for the satisfaction of our customers, community and other interested parties and thus for the lasting success of our company.
